

Overview

The Global Consulting Career Framework outlines the stages in a Syniti Consultants career within the Delivery Services organization and provides an indication of the type of activities that are expected to be performed at that level. While the dynamic nature of the consulting business ensures this will never be fully comprehensive, it provides a guide to what our consultants can expect from Syniti, facilitating discussions and plans for progression.

Scope

This document applies to all consulting resources in the following specializations:

- Data Migration
- Data Governance
- Data Quality
- Solution Management

How to Use This Document

This document should be the foundation of annual performance review conversations between consultants and their performance managers. For consultants pursuing a change in level, this framework outlines the expectations and objectives a professional should meet in order to achieve a promotion. In performance conversations, this document outlines, at a foundational level, the baseline expectations of the organization.

Global Consulting Levels

The levels of the Syniti Consulting Career Framework are applied globally, with consistent expectations at each level. Some titles are used specifically within certain regions, but the levels, skills and competencies are shared.

Our Consulting organization offers two career tracks for our professionals to provide client service:

Managing Track: Intended for those consultants who wish to grow as project, program, and eventually delivery partner with people management responsibilities.

Solution Track: Provides a path for technical-oriented consultants to deepen their expertise with a path to technical solution leadership and excellence in a subject area with some people management responsibilities.

The Syniti Values

As a Consultant with Syniti we pride ourselves as the team with the strongest capability and the best attitude, delivering the right outcome to the client at the right time. There is a 'Customer for Life' purpose to everything we do. To achieve this outcome, we need to embrace the Syniti mindset. A Syniti consultant demonstrates this mindset both with their peers internally and clients externally every day.

At Syniti we aspire to	Meaning and examples
Think Big	✓ <i>Be courageous and bold.</i> ✓ <i>Aspire to greatness.</i> ✓ <i>Relentlessly pursue market innovation.</i> ✓ <i>Set the standard by which others follow.</i> ✓ <i>Create solutions that have a meaningful impact.</i> ✓ <i>Solve the challenges our customers do not know they have.</i>
Be Curious	✓ <i>Be a lifelong learner.</i> ✓ <i>Seek out innovative ideas to serve customers</i> ✓ <i>Understand our competition and the world.</i> ✓ <i>Be permanently dissatisfied with the status quo.</i> ✓ <i>Understand our competition and the world.</i> ✓ <i>Challenge preconceptions</i> ✓ <i>Focus on the future rather than yesterday.</i>
Take Action	✓ <i>Be the first.</i> ✓ <i>Do not wait.</i> ✓ <i>Take accountability.</i> ✓ <i>Inspire others by doing.</i> ✓ <i>Fail fast and learn from mistakes.</i> ✓ <i>Make a difference every day.</i>
Be Stronger Together	✓ <i>Respect, trust, and look out for each other.</i> ✓ <i>Celebrate diverse perspectives.</i> ✓ <i>Listen</i> ✓ <i>Build connections and belonging</i> ✓ <i>Act with integrity</i> ✓ <i>Give back.</i> ✓ <i>One Syniti family.</i>

The final point is to ALWAYS demonstrate an **open** and **collaborative** attitude with regular trusted **communication** when working with your Syniti colleagues and clients. This is our community to thrive in!

Guiding Principles for Consulting

To accompany the Syniti values we have created a set of Guiding Principles that model our behavior and approach to our daily work.

✓ Timely time and expense entry ✓ Trust your team ✓ No such thing as a silly question ✓ Work to the documented project scope ✓ 15-minute rule – ask someone else for help when stuck! ✓ Escalate to expedite ✓ Corridor conversations can be important ✓ No social media onsite ✓ Be polite and respectful at all times ✓ Be open	✓ Be respectful of hourly billing ✓ Support your colleagues ✓ Work as a team ✓ Document key meeting outcomes ✓ Constructive feedback always appreciated ✓ Base key decisions on documented facts ✓ Communicate effectively and objectively ✓ Collaborate to get to the answer ✓ Document risk when creating client options and recommendations
--	--

Education and Certification

As an organization we offer multiple Syniti based trainings and certifications. The expectation for all Syniti consultants is to enroll and take the trainings required for your specified practice area. We also expect that our Consultants apply for and pass our certifications pertaining to your specified practice area. If you would like to have other certifications related to our field such as SAP certification, PMP certification, etc., it is not required, but can be beneficial based on your career path.

Consultant Expectations

As a valued consultant in Syniti we all need to play our part in the running of the business. Our Kimble system is the center of time and expense recording that flows right onto the client billing procedures each month. Any delays or inaccuracies lead to costly outcomes, we ask everyone to adhere to the process timings to keep this process running smoothly.

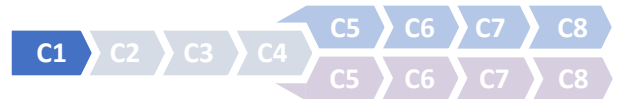

Weekly T&E Process Timing

- **Time Entry** – It is expected that every consultant owns their time entry into Kimble **before 18:00 on** Friday of the completed week.
 - Use your Project Manager / Line Manager or Resource Management team to escalate problems for timely resolution. Ideally the recording would be done daily or on Friday evening.
- **Time Approval** - needs to be completed **before 12:00 on** Monday after the week worked.

NOTE: Vacation and sick time must be entered by the consultant according to regional policies and expectations

Associate Consultant (C1)

Contributes Dependently

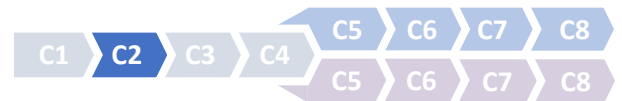

Master's basic and routine tasks with supervision aligning with SynitiONE Methodology as part of a larger activity or project. Takes initiative and exercises creativity within their assigned area. Develops the ability to work and communicate within a team, manage assigned tasks, and meet deadlines. Proactively seeks out additional training on technologies, methodologies and data tools.

Specialist Skills

<i>Independence</i>	- Aligns with and follows Delivery and Corporate goals. - Accomplishes basic build tasks without supervision. - Utilizes Syniti and client property and funds, including IT assets, travel expenses, and office resources efficiently and with professionalism. - If traveling, arrives to client sites on time, in appropriate attire, and conducts themselves politely, professionally and with decorum at all times consistent with or exceeding the expectations of both Syniti and the client. - Follows leadership direction aligning with timelines and deliverables.

Progression Criteria	
<i>Evaluation Criteria</i>	For an Associate Consultant to be considered for a promotion to Consultant, they are expected to complete all of the criteria above related to their field and must show competency in the below. Note: Business needs will determine availability of open positions.
<i>Data Migration</i>	• Has the ability to build more complex transformations and construction pages with minimal guidance. • Can create/update custom reports that are not out of the box. • Has a basic understanding of one SAP workstream and the standard objects and primary targets related to it. • Demonstrates appropriate basic client verbal and written communication.
<i>Data Governance</i>	• Has assisted in creating a moderately complex development or workflow, including role-based or dependent logic. • Executes Unit Testing independently to verify the functionality is working properly. • Demonstrates appropriate basic client verbal and written communication.
<i>Data Quality</i>	• Can create/update custom reports that are not out of the box. • Can create basic construction pages with minimal guidance. • Understands the Data Quality Architecture. Demonstrates appropriate basic client and written communication

Consultant (C2)

Contributes Dependently

Confident in more routine project tasks and engages in becoming a Syniti customer-facing consultant. Takes initiative and exercises creativity within unfamiliar areas with guidance from colleagues. Starts to build an internal network of relationships on and off the project. Understands own knowledge gaps and drives to take on additional training of our technologies, methodologies, and data tools.

Specialist Skills	
<i>Data Migration</i>	- Performs moderately complex transformation and data construction page development. - Participates with workstream leads to define mapping specifications. - Builds business-ready data transformations from mapping specifications. - Independently performs unit testing and validation to ensure functionality is consistent with requirements. - Creates and updates custom, non-standard reports on their own. - Has basic working knowledge and capabilities of loading data using multiple load methods and interfacing with source/target systems.
<i>Data Governance</i>	- Performs moderately complex development, including role-based or dependent logic based on prior work experience. - Performs individual unit testing to ensure functionality is consistent with requirements. - Understands key data governance concepts and core documents, including data standards, data policies, data procedures and charters. - Has an understanding of integration techniques that are appropriate for their use cases.
<i>Data Quality</i>	- Develops Reports with medium complexity. - Starts interacting with the business as part of job tasks. - Understands Data Quality concepts and architecture. - Understands the tables logic and gets familiar with additional ERP objects.
Consulting Skills	
<i>Technology, Quality & Methodology</i>	- Understands and applies SynitiONE implementation phases with guidance. - Understands basic relational data models as it pertains to their assigned work product. - Creates moderately complex SQL objects. - Has understanding of SynitiONE Methodology related to each component of a project.
<i>Functional Skills</i>	- Demonstrates a working knowledge in at least one SAP functional area. - Understands the “business” of consulting and aware of the products and services provided by Syniti to customers. - Is aware of the key industries which Syniti works with. - Able to use prior knowledge and experience to adapt to new functional situations.
<i>Consulting Skills</i>	- Identifies risks/issues and escalates appropriately to the correct individuals on the project. - Suggests root cause analysis and solutions with team members. - Looks at project constraints with an analytical mindset actively contributing to resolve them. - Own defects and seek guidance to resolve them as needed. - Understands the customer’s business strategy, objectives, and organization structure.
<i>Communication</i>	- Meets and interacts with client counterparts to gather requirements, review outcomes, and refine project development. - Develops effective liaisons with Project leadership and client. - Can determine when to answer or redirect client questions or comments.

<i>Growth of Self, Practice & Others</i>	• Sets own development goals and objectives with the assistance of advisors and managers. • Is inquisitive in their contribution to project delivery, seeking understanding to learn and deliver for the client & task. • Understands project lifecycle concepts and timings. • Contributes documentation for content and education creation.
<i>Independence</i>	• Prepares appropriate documentation as needed to support project deliverables. • Proactively identifies and notifies project manager(s) of challenges related to task scheduling or completion. • If traveling, engages in business travel independently, effectively and with professionalism while representing Syniti.
Progression Criteria	
<i>Evaluation Criteria</i>	For a Consultant to be considered for a promotion to Senior Consultant, they are expected to complete all of the criteria above related to their field and must show competency in the below. Note: Business needs will determine availability of open positions.
<i>Data Migration</i>	• Can plan and facilitate mapping sessions for conversion objects they are familiar with, with the appropriate materials needed and approval from lead. • Can speak to at least one SAP workstream area along with the basic understanding of the 3 major SAP objects (Business Partner Customer Master, Material Master, and Business Partner Vendor Master). • Demonstrates appropriate client verbal and written communication.
<i>Data Governance</i>	• Can troubleshoot existing solutions effectively • Can build and support new business requirements from scratch based on prior experience. • Demonstrates appropriate client verbal and written communication.
<i>Data Quality</i>	• Can create preparation logic independently based on client design • Owns Data Quality configuration for rules. • Demonstrates autonomy following the Development Standards and understanding of the tasks. • Demonstrates appropriate client verbal and written communication.

Senior Consultant (C3)

Contributes Independently

Accumulating greater responsibility for a definable portion of a work process with more independence and little to no supervision. Builds technical ability and expertise along with the credibility and reputation for delivering competent quality work. Manages more of their own time and is more accountable for their outcomes. Builds a strong internal network of relationships, relying less on their project/team lead for direction and more on their fellow team members. Works on strengthening independent customer facing skills.

Specialist Skills

<i>Data Migration</i>	- Performs development, testing, loading, and reconciliation activities from start to finish independently. - Responds to business inquiries regarding data related issues managing data cleansing and validation with the business data owners. - Possesses a level of functional/technical expertise within their respective specialist area, working with other process teams to assist in identifying cross-team issues. - Runs execution plans for cutover activities within their target area, identifying and working with business object owners. - Participate in the Business Blueprint workshops. - Planning and facilitating mapping sessions. - Develops complex data transformation logic and construction page development.
<i>Data Governance</i>	- Builds, configures, and maintains complex applications or information governance solutions independently - Challenges client requirements to ensure they are as complete and accurate as possible. - Creates effective data standards, policies, and procedures consistent with client and project lead requirements. - Understands common data governance organizational models and relative advantages of each.
<i>Data Quality</i>	- Understands and owns configuration of the Data Quality configuration and architecture based on documented design and strategy. - Capable of explaining reports development to other team members. - Manages the business conversations where needed. - Develops any complexity reports with little supervision.

Consulting Skills

<i>Technology, Quality & Methodology</i>	- Implements and develops customer deliverables independently using SynitiONE methodology and tools. - Understands complex data models. - Creates complex SQL objects for data transformation and analysis. - Has proficiency in SynitiONE Methodology within primary workstream (i.e., migration, data quality, governance, archiving, etc.). - Develops requirements for Syniti Solutions from inception to conclusion.
<i>Functional Skills</i>	- Demonstrates a solid working knowledge in at least one solution area and is acquiring a basic level of knowledge in other areas. - Has high level overview of basic config related to source/target systems. - Can speak to at least one SAP workstream area along with the basic understanding of the 3 major SAP objects (Business Partner Customer Master, Material Master, and Business Partner Vendor Master).
<i>Consulting Skills</i>	- Displays individual task scoping skills with the ability to identify and propose solutions to remedy. - Inspires customer confidence through technical knowledge and performance.

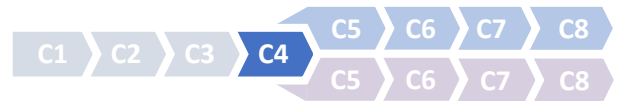

<i>Communication</i>	- Validates work requests against project scope and prepares organized feedback to leadership. - Able to guide client counterparts through deliverables within area of responsibility and offers explanation and support through related processes. - Monitors progress against deliverables and reports status to workstream lead. - Serves as the liaison to business area subject matter experts and leads alongside Workstream Lead. - Assists with the preparation of customer and internal status reports. - Begins to develop new contacts within Syniti, the industry, and Customer's organization. - Understands client organizational structure and appropriate communication paths.
<i>Growth of Self, Practice & Others</i>	- Supports, advises, and mentors junior resources on SynitiONE best practices in delivery and development. - Understands the Region's business goals and how to contribute to achieving those goals. - Develops capacity to lead small internal teams and organize their work according to delivery plans. - Takes steps to self-direct career, including exploration of consulting career paths and aligning development objectives and training to desired career path. - Develops strong lines of communication with both Matrix Managers and Advisors.
<i>Independence</i>	- Makes prioritization one of their top objectives for a project. - Prepares complete deliverables that require minimal guidance. - Makes decisions within own work. - Supports the Project Manager in administering basic tasks.

Progression Criteria

<i>Evaluation Criteria</i>	For a Senior Consultant to be considered for a promotion to Lead Consultant, they are expected to complete all of the criteria above related to their field and must show competency in the below. Note: Business needs will determine availability of open positions.
<i>Data Migration</i>	- Has complete knowledge of one SAP workstream, demonstrates object ownership within multiple workstreams and can also speak to the 3 major SAP objects (Business Partner Customer Master, Material Master, and Business Partner Vendor Master). - Shows ability to lead other consultants effectively and provide status of tasks for self and others
<i>Data Governance</i>	- Can facilitate the creation of data governance, metadata management, and/or reference data management applications and processes. - Demonstrates end to end object ownership in technical and functional knowledge - Shows ability to lead other consultants effectively and provide status of tasks for self and others
<i>Data Quality</i>	- Orchestrate all the steps in a Data Quality implementation end to end. - Demonstrates end to end object ownership in technical and functional knowledge. - Shows ability to teach other consultants effectively and provide status of tasks for self and others.

Lead Consultant (C4)

Contributes Independently and Through Others

Recognized as a subject matter expert with strong technical and consulting skills. Conducts highly complex work unsupervised and with extensive latitude for independent judgement. Expected to show significant initiative and leadership. Makes a broader impact by influencing and leading others without having broad people management responsibility. Expected to own and manage a workstream or small project.

Specialist Skills	
<i>Data Migration</i>	• Delivers end to end data migration solutions including design, build, testing, validation, and execution in the assigned area of focus. • Leads Mock cycle and Cut-over planning for data migration paths and activities for their sphere of influence area of focus. • Contributes to data deliverables for the broader project or data stream. • Leads the preparation and review of data quality findings and the creation of action plans in the assigned area of focus. • Facilitates workshops and training on complex data migration applications and processes. • Delivers project metrics and status to project and client leadership teams. • Enforces and guides others on the application of Syniti Methodology across the migration toolsets.
<i>Data Governance</i>	• Supports the execution of client's data governance strategy in implementation. • Facilitates workshops and training on data governance & data quality applications and processes. • Directs the creation of data governance, metadata management, and reference data management. • Consults clients on best practices for data governance organization design. • Enforces and guides others on the application of Syniti Methodology across the governance toolsets.
<i>Data Quality</i>	• Understands Data quality strategy and is able to support the creation of a project plan. • Implementing the base line architecture of Data Quality. • Directs the creation of Data Quality Reports. • Leading a Data Quality effort according to Project Plan.
Consulting Skills	
<i>Technology, Quality & Methodology</i>	• Demonstrates advanced competency in the technology required to develop objects within their practice. • Establishes and enforces guidelines for proper use of Syniti Methodology during project lifecycle build cycles. • Can identify root causes of complex technical issues within their practice. • Demonstrates an advanced level of expertise in the Syniti toolsets associated with their practice. • Ensures high quality development deliverables from self and team members.
<i>Functional Skills</i>	• Demonstrates functional expertise in at least one SAP workstream and a solid working knowledge in other areas. • Can speak with an advanced level of functional expertise to team members within their respective workstream. • Understands the functional relationships between the objects in their workstream and cross dependencies with objects in other workstreams. • Develops new contacts within Syniti, the industry and Customer's organization.

	Understands dynamics of project participants, including system integrator, client, software vendor and Syniti; works within project structures to represent mutual best interests.
<i>Consulting Skills</i>	- Demonstrates an advanced level of expertise in at least one industry area and a solid working knowledge of others. - Analyzes and solves problems in non-routine, complex situations. - Identifies opportunities to enhance methodologies and recommends changes. - Considers the impact of management decisions on task/object project cost and timeline within their workstream. - Can describe and compare options in terms of Customer ROI for typical implementation scenarios. - Manages and triages data defects. - Coordinates and monitors effective knowledge transfer of Syniti methodologies to client team members. - Effectively manages customer expectations. - Aware of scope specific to focus area and able to call out additional scope to project leadership.
<i>Communication</i>	- Initiates and facilitates communication with client subject matter experts and business process experts surrounding data migration activities. - Develops trusted advisor relationships with key client personnel at the project level. - Ensures client satisfaction by effectively communicating both upward to client management and downward to team members within and across workstreams. - Can identify and proactively escalate issues to appropriate management levels.
<i>Growth of Self, Practice & Others</i>	- Selects a consulting career path and communicates a plan to organizational leadership to achieve targeted objectives and goals aligned to desired path. - Develops strong relationships with Advisors and Managers. - Collaborates with advisees and direct reports to determine their career path goals. - Provides performance expectations to team members and assists in preparing year-end and/or end of assignment project performance evaluations. - Actively pursues increasing expertise in Syniti toolsets, workstream and industry knowledge. - Gains an understanding of solution offerings in other practices and can speak at a high level to a customer about Syniti's capabilities
<i>Independence</i>	- Completes deliverables with limited guidance and high level of quality. - Assumes responsibility for the performance of a team. - Provides management and oversight to their respective area of focus to ensure adherence to SynitiONE methodology and Project timelines. - Routinely prepares customer and internal status reports.

Progression Criteria

<i>Evaluation Criteria</i>	For a Lead Consultant to be considered for a promotion to Managing Consultant/Solution Architect, they are expected to complete all of the criteria above related to their field and must show competency in the below. Note: Business needs will determine availability of open positions.
<i>Data Migration</i>	- Has complete knowledge of multiple workstreams and can also speak to the 3 major objects (Business Partner Customer Master, Material Master, and Business Partner Vendor Master). - Has competency/experience in all concepts of an end-to-end project execution. - Supports Syniti Billing team in the alignment of customer billing process. - Makes decisions with guidance to maintain baseline margin of the engagement for the team.

	• Has led a small project or has competency/experience in all concepts of project leadership.
<i>Data Governance</i>	• Can create a plan and track team capacity and realization for given scope. • Has competency/experience in all concepts of an end-to-end project execution. • Supports Syniti Billing team in the alignment of customer billing process. • Makes decisions with guidance to maintain baseline margin of the engagement for the team. • Has led a small project or has competency/experience in all concepts of project leadership.
<i>Data Quality</i>	• Can create a plan and track team capacity and realization. • Complete knowledge of Data Quality architecture. • Capable to implement and explain the entire solution • Has competency/experience in all concepts of an end-to-end project execution. • Supports Syniti Billing team in the alignment of customer billing process. • Makes decisions with guidance to maintain baseline margin of the engagement for the team. • Has led a small project or has competency/experience in all concepts of project leadership.

Managing Track

The **Managing Track** is intended for those consultants who wish to grow as a project or program lead, and eventually delivery partners with people and team management responsibilities.

Managing Consultant (C5)

Contributes Through Project Management

Leads teams to apply their cumulative knowledge, skills, and abilities to solve customer needs, while also managing customer relationships and developing new business. Has full project management responsibility for one or more moderately complex, on-going or new projects. Carries significant responsibility for people management development.

Overview

<i>Expected Contributions</i>	- Provides overall leadership in execution of a project, including project planning and approach for one or more moderately complex projects, delivery centers, or managed service teams. - Organizes project team and coordinates united effort to achieve and exceed deliverables. - Anticipates RAID items and proactively works to mitigate them. - Leads all projects in accordance with SynitiONE Implementation Standards. - Coordinates and communicates with the client(s)' PMO. - Conducts resource planning for team and subject matter experts related to project activities. - Publishes and maintains project status dashboard and metrics reporting. - Designs and monitors deployment execution demographics and efficiencies. - Oversees knowledge transfer and team mentoring. - Quantifies and estimates new work efforts. - Actively manages engagement margin, time, burn and costs through Kimble and Consulting App reports. - Resolves serious customer issues without damaging the relationship. - Assures broad, project-based customer satisfaction. - Consistently delivers profitable engagements by controlling the fees and expenses incurred to be within planned budgets and profitability level. - Demonstrates complete understanding of all assigned contract terms, risks, and policies for project. - Provides performance expectations to all new "direct report" team members. - Responsible for ensuring year-end and/or end of assignment performance evaluations are conducted with all project personnel. - Removes obstacles to effective individual and team performance. - For remote teams - Develops and maintains accountability for a group of onsite or delivery center professionals, including work schedules and physical space(s) in addition to client and company deliverables.
<i>Certifications Required</i>	- Syniti DSP / SKP Certified (legacy bootcamp training) - Syniti Migrate / SAP ADMM Certified
<i>Independence</i>	Works under minimal supervision. Has considerable latitude within their area of responsibility to determine how to organize people and activities so as to get the most out of the resources provided.
<i>Influence</i>	Project leadership both internal and external.

Progression Criteria

<i>Requirements to Promote</i>	For a Managing Consultant to be considered for a promotion to Principal Consultant, they are expected to complete all of the criteria above related to their field and must show competency in the below. Note: Business needs will determine availability of open positions.
--------------------------------	---

- Successful leadership of one or more full lifecycle data projects
- Successful financial management of one or more full lifecycle projects according to key metrics (sold to delivered)
- Proven ability to lead large teams of consultants
- Proven ability to manage managers (i.e. is a leader of leaders)
- Positive endorsement from client project lead or data lead as someone who is ready to manage large-scale initiatives.
- Demonstrated understanding of the principles and methodology for both migration and governance projects and their relationship to one another.

Principal Consultant (C6)

Contributes Through Project & Program Management

Leads multiple teams to apply their cumulative knowledge, skills, and abilities to solve customer needs, while also managing customer relationships and developing new business. Has full project management responsibility for one or more complex or very large projects. Carries significant responsibility for people management development. Drives the improvement and refinement of new and existing solutions.

Overview

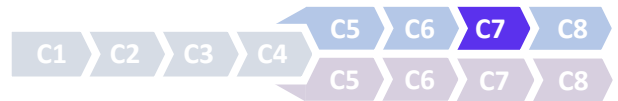

<i>Expected Contributions</i>	- Provides leadership through program management, including project planning and approach for multiple complex or very large projects, delivery centers, or managed service teams. - Oversees project team(s) and coordinates united effort to achieve and exceed deliverables. - Ensures best practice methodologies are continually improved. - Publishes and maintains program management status dashboard and metrics reporting for a variety of projects. - Mentors junior PMs on Syniti standards and best practices. - Develops trusted advisor relationships with senior-level customer personnel. - Resolves complex escalated customer issues without damaging the relationship or need to involve senior management. - Maintains engagement baseline margin by controlling non-billable time and expenses. - Demonstrates complete understanding of all assigned contract terms, risks, and policies for all project under program management. - Facilitates new SOWs and complex Change Orders for out-of-scope items in a timely manner. - Identifies new opportunities within their accounts to pursue - Effectively enforces the contract's terms and conditions and type of contract. - Works effectively inside Syniti to facilitate modifications and other contracting issues. - Identifies assignments to facilitate on-the-job professional development. - Effectively supervises project team members and helps them to achieve their career aspirations.
<i>Certifications Required</i>	- Syniti DSP / SKP Certified (legacy bootcamp training) - Syniti Migrate / SAP ADMM Certified
<i>Independence</i>	Works under minimal supervision. Has considerable latitude within their area of responsibility to determine how to organize people and activities so as to get the most out of the resources provided.
<i>Influence</i>	Project/services leadership both internal and external.

Progression Criteria

<i>Requirements to Promote</i>	A Principal Consultant wanting to promote to Delivery Partner shall apply for the Delivery partner role and shall undergo a dedicated interview cycle with the appropriate Syniti leaders upon completing all the criteria above related to their field, as well as: - Positive endorsement from multiple leaders at two or more client organizations. - Positive endorsement from three or more peers within Syniti - Positive endorsement from three or more subordinates from current or prior projects within Syniti.
--------------------------------	--

Delivery Partner (C7)

Contributes Tactically and Strategically Regionally

Helps shape the future direction of a portion of the organization by providing management direction and exercising influence over critical decision making over a designated area of the business. Defines and determines the direction of business opportunities and needs. Works to maximize the financial performance of their area of responsibility through delivery leadership of existing accounts and supporting the growth of new ones. Represents the organization in a wide assortment of interactions, both inside and outside the organization. Supports multiple projects by collaborating with Project and Program Managers and leveraging resources to maximize project performance and minimize risk.

All Principal Consultants looking to become a Delivery Partner will need to apply for the role.

Overview	
<i>Application Requirements</i>	• Presentation to Leadership • Provide documentation of building client relationships • Provide documentation of financial excellence
<i>Expected Contributions</i>	• Responsible for delivery quality and financial performance of area of responsibility, which may be an industry, practice, geographical, or other collection of accounts. • Provides overall program planning and deployment oversight for accounts within their area of responsibility. • Ensures that consultants working on their projects grow in functional, technical, and consulting skills, particularly within the industry or practice assigned. • Develops expectations for engagement management within the region. • Provides for continuity of personnel as needed (e.g., number, skills, C level). • Effectively supports engagement and proposal teams. • Effectively manages the most difficult and complex relationships with important customers and partners. • Assists in negotiating and approving business terms and conditions of contracts with customers and teaming partners. • Works to seek out new opportunities within the client to maximize revenue opportunity. • Listens to client problems and works solutions to drive deeper adoption of Syniti solutions. • Raises delivery issues to appropriate levels within the client and Syniti, highlighting when the initial objective of the engagement understanding is changing. • Ensures the submission of project reports internally and externally alongside the PM or Delivery Lead where there is no PM staffed. • Adheres to all PM Score metrics in a timely manner. • Proactively suggests process improvements in delivery methodology, approach, or back-office support functions. • Watches for health of the team, escalating as required. Overtime and individual excessive workload are early indicators of need for escalation and burn out. • Effectively supervises Project Managers and helps them to achieve their career aspirations. • Developing internal content regularly to help with the growth of our newer consultants in our delivery centers. • Proven experience in leading global data migration, data quality and data governance programs. • Proven experience leading large data management teams with team members around the world. • Multiple successful program go-lives at large global organizations.

	• Expertise in data management delivery methodologies. • Impeccable client-facing communication skills, including executive presence and exceptional presentation skills. • Strong technical knowledge and a desire to maintain technical excellence. • Strong bias for action and proven ability to take independent initiative and to make decisions under pressure. • Strong ability to manage stakeholders and build relationships. • Exceptional written and verbal communication skills.
<i>Certifications Required</i>	• Syniti DSP / SKP Certified (legacy bootcamp training) • Syniti Migrate / SAP ADMM Certified • Certified Syniti Data Migration Professional • Certified Syniti Data Governance Professional • Certified Syniti Performance Management Professional
<i>Independence</i>	Works with limited supervision to collaboratively determine, with account and project leadership, how to maximize project performance and minimize risk.
<i>Influence</i>	Actively manages and delivers a project portfolio showing leadership with their teams and client stakeholders.
Progression Criteria	
<i>Requirements to Promote</i>	A Delivery Partner wanting to promote to Senior Delivery Partner is expected to complete all of the criteria above related to their field. • Delivery Partners are expected to apply for the Senior Delivery Partner position. • Delivery Partners are expected to secure the positive endorsement from peers, subordinates, and clients as part of their application. • Delivery Partners will be expected to give a live presentation to a panel audience on a topic to be determined by the hiring manager.

Senior Delivery Partner (C8)

Contributes Strategically Globally

Shape the future direction of a Practice within Syniti by providing strategic direction and exercising significant influence over critical decision making within their area of influence and beyond. Executes the direction of critical business opportunities and needs within a practice. Represents the practice in a wide assortment of interactions, both globally inside and outside the organization. Innovates, justifies, and represents the Practice business goals to Executive Management. Sponsors and mentors promising individuals to prepare them for leadership roles within Syniti.

All Delivery Partners looking to become a Senior Delivery Partner will need to apply for the role.

Overview	
<i>Application Requirements</i>	• Presentation to Leadership • Provide documentation of building client relationships • Provide documentation of financial excellence
<i>Expected Contributions</i>	• Responsible for delivery quality and financial performance of area of responsibility, which may be an industry, practice, geographical, or other collection of accounts. • Provides overall program planning and deployment oversight for accounts within their area of responsibility. • Ensures that consultants working on their projects grow in functional, technical, and consulting skills, particularly within the industry or practice assigned. • Holds Project Managers and Delivery Partners accountable for complete and accurate project planning. • Provides for continuity of personnel as needed (e.g., number, skills, C level). • Proactively innovates Practice methodology and builds capability to enforce structure of methodology within their Practice team members. • Creates and leverages executive-level “Promotor” relationships. • Builds business cases to justify investment requests for the Practice. • Effectively manages investments for the long-term improvement of both regional and global business. • Responsible for achieving regional P&L and margin targets. • Provides growth opportunities for the professional development of others. • Proven experience in leading global data migration, data quality and data governance programs. • Proven experience leading large data management teams with team members around the world. • Multiple successful program go-lives at large global organizations. • Expertise in data management delivery methodologies. • Impeccable client-facing communication skills, including executive presence and exceptional presentation skills. • Strong technical knowledge and a desire to maintain technical excellence. • Strong bias for action and proven ability to take independent initiative and to make decisions under pressure. • Strong ability to manage stakeholders and build relationships. • Exceptional written and verbal communication skills.
<i>Certifications Required</i>	• Syniti DSP / SKP Certified (legacy bootcamp training) • Syniti Migrate / SAP ADMM Certified • Certified Syniti Data Migration Professional • Certified Syniti Data Governance Professional • Certified Syniti Performance Management Professional

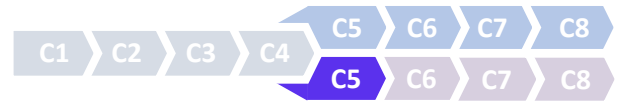

<i>Independence</i>	Works proactively and decisively understanding global implications with limited supervision to collaboratively determine, with account and project leadership, how to maximize project performance and minimize risk.
<i>Influence</i>	Global technical leadership, ideas and deliverables have an effect on all Syniti delivery consultants worldwide. Partner and Alliance implementation teams follow their lead.
